

Index to DBS Adverse Effects, by Effect and Site of Stimulation for use with Deep Brain Stimulation Programming: Mechanisms, Principles and Practice, 2<sup>nd</sup>, Erwin B. Montgomery Jr., Oxford University Press, 2016

By Side Effect

|                              |                          |
|------------------------------|--------------------------|
| Ataxic gait                  | pages 131, 132           |
| Depression                   | page 136                 |
| Diplopia                     | page 132                 |
| Dysphoria                    | page 136                 |
| Eye deviation – conjugate    | page 128                 |
| Eye deviation – dysconjugate | page 132                 |
| Impulse control              | page 136                 |
| Mania                        | page 136                 |
| Muscle contractions          |                          |
| Globus pallidus              | pages 143, 145           |
| Subthalamic nucleus          | pages 131, 133, 134      |
| Thalamic                     | pages 149, 152, 154, 155 |
| Paresthesias                 |                          |
| Subthalamic nucleus          | pages 131, 135           |
| Thalamic                     | pages 149, 150           |
| Phosphenes                   | pages 38, 143, 207       |
| Speech                       |                          |
| Subthalamic                  | page 130                 |
| Globus pallidus              | page 130                 |
| Thalamic                     | pages 130, 154, 155, 157 |
